Declaration of Compliance

with legislation(s) for articles intended to come into contact with foodstuffs

In compliance with the Union Guidelines on regulation (EU) No 10/2011 as regards information in the supply chain

1. DoC Issued by:

Issued by
Company : Haval BV
Address : Oost-om 33
5422 VX
Gemert, Netherlands
Contact person : Mr. E. v. Limpt

2. Manufactured by:

Company : Haval BV
Address : Oost-om 33
5422 VX
Gemert, Netherlands

3. Identity (product or representative sample)

The Eggchef Cup 2 semi-transparent, art.nr. EGG-C-2, delivered by Haval BV to Eggciting Products BV uncoloured, consisting of the basic polymer PP Random Copo.

4. Issued date:

13-10-2025

5. EU regulatory status of the above mentioned articles

We declare that:

EC Regulation 1935/2004
The above mentioned articles delivered by Haval Disposables complies with the safety aspects set out in Article 3(1)(a) of the Framework Regulation (EC) 1935/2004

GMP
The above mentioned articles delivered by Haval Disposables have been manufactured in accordance with the relevant requirements of Commission Regulation EC No. 2023/2006 on good manufacturing practice for materials and articles intended to come into contact with food.

Traceability
Haval Disposables has systems in place fulfilling the relevant aspects on traceability as required in article 17.1 of Regulation (EC) No. 1935/2004.

5.a Used monomers and additives.
The above mentioned articles have been manufactured only with monomers, other starting substances and additives that are authorised under the Plastics Regulation 10/2011/EC (up to and including the amendment (EU) 2024/3190).

5.b Other substances used in the formulation of the above mentioned articles
Other substances used in the manufacturing of the above mentioned articles are listed in:

Dutch Regeling Verpakkingen- en Gebruiksartikelen (Warenwet).
Chapter 1 – Kunststoffen.
https://zoek.officielebekendmakingen.nl/stcrt-2014-8531.html

Pigments and Colorants
Colorants and/or pigments used in the formulation of the above mentioned articles**,** that are not regulated by 10/2011/EC (up to and including the amendment (EU) 2024/3190), are in compliance with:

Dutch Regeling Verpakkingen- en Gebruiksartikelen (Warenwet).
Chapter XI – Colorants and pigments
https://zoek.officielebekendmakingen.nl/stcrt-2014-8531.html

Or:

Resolution AP (89) 1 of the Council of Europe "On the use of colorants in plastic materials coming into contact with food", II, 2 (purity).

5.c Overall Migration
The above mentioned articles complies with the overall migration limit tested under the following conditions:

- Test conditions: 10 days at 60°C (simulant B and D1), repeated use

Migration experiments carried out with food simulants during the above mentioned conditions have shown that under these test conditions (according to EN 1186) the specific and overall migration limits were not exceeded in 3% acetic acid and 50% ethanol. The foodstuffs corresponding with the food simulants are stipulated in EU regulation 10/2011/EEC.

It should be noted that the representative samples have been tested for the above mentioned conditions only. It is the responsibility of the legal entity responsible for placing on the market of the article to ensure that the usage of the articles is safe, lawful and technically suitable and can determined through mutual consultation and agreement.

5.d The above mentioned articles are not yet in contact with food and/or intended for direct use by consumers.

Sensorial testing showed no significant deteriorations.

6. Regulatory status of used substances

We declare that:

6.a Used substances subject to restrictions in national legislation
Substances (colorants, polymer production aids, substances on the provisional list) used in the formulation of the above mentioned articles are subjected to restrictions in national legislation.

6.b Monomers
Monomer(s) used in the formulation of the above mentioned articles are listed in EU regulation 10/2011/EC (up to and including the amendment (EU) 2024/3190.

6.c Additives
Additives used in the formulation of the above mentioned articles are listed in EU regulation 10/2011/EC (up to and including the amendment (EU) 2024/3190).

6.d Substances listed in Annex II (1), metals
Substances listed in Annex II (1), to the Plastics Regulation are present. These substances cannot be released above the limit specified.

6.e PAAs (Primary Aromatic Amines) covered by Annex II to the Plastics regulation
The products may contain Primary Aromatic Amines. Paas cannot be released above the limit specified.

6.f Restrictions of substances in the above mentioned articles mentioned in points a), b), c), d) and e) are complied with, based on worst case calculations and migration testing.

7. Presence of dual use additives.

A substance is defined as a "Dual Use Additive" if the chemical identity of the plastic additive matches that of an authorized food additive or flavouring, regardless of its purity or whether or not the substance is subject to a restriction in food and/or plastic. In case of salts it is the salt that matters, not the authorized acid, phenol or alcohol.

Information on substances with specific migration limit in accordance with Regulation (EU) No 10/2011 and dual use substances:

FCM No	Ref. No	CAS No	SML mg/kg	Substance name	Dual use substance
-	-	-	1	Aluminium	No
-	-	-	60	Calcium	Yes
-	-	-	60	Mono and diglycerides of fatty acid	Yes
19	39090	-	1,2	N,N-bis(2-hydroxyethyl)alkyl (C8-C18)amine	No
20	39120	-		N,N-bis(2-hydroxyethyl)alkyl (C8-C18)amine hydrochlorides	No
106	24550/ 89040	27676-62-6	60	Calcium stearate	Yes
500	38560	7128-64-5	0,6	2,5-bis(5-tert-butyl-2-benzoxazolyl)thiophene	No
808	38550	882073-43-0	5	Bis(4-propylbenzylidene) propyl sorbitol	No

8. Final use of the above mentioned articles

8.a These articles are allowed to be in contact with acidic, alcoholic and fatty food types.

8.b These articles are intended to come into contact with food under the following conditions of use: any long term storage at room temperature or below, including contact with food for a maximum of 15 minutes at 100°C.

8.c The maximum ratio of the area of the food contact material to the volume is 6 dm^2 FCM/kg.

The information provided in this document is restricted to the stated articles delivered by Haval Disposables as it leaves its production facilities.

The information included in this document is valid from the stated version date until this document is superseded. Because of possible changes in the underlying legislation and regulations, as well as possible changes in our products, we cannot guarantee that the status of this document will remain unchanged. We, therefore recommend our customers to verify the regulatory status periodically. It will be renewed in all cases where the previous conformity is no longer ensured

In the name of Mr. E. v. Limpt
