TY GOAL

Not just a standard solution
And according to Karsten Felvang, a lot of work has been done on flexibility.

industry. He knows the workflows in a hotel, what happens in the kitchen, restaurant, guests, etc., and this affects the entire collaboration", says Karsten Felvang.

Functional and beautiful at the same time
He emphasizes that Steelwood Concept is a supplier where the functionality of the products is top notch and at the same time the products are nice to look at - and then you can have things made so that they are very personal and match the rest of the interior.

"They are good at that. It's quality and good craftsmanship, and it's the best buffets we've ever had"
says Karsten Felvang.

Steelwood Concept has delivered bufets to Scandic Spectrum and Scandic Falkoner and, in addition, cutting boards, wooden boxes and various custom-made shelves above the workstations in the kitchen, and we has just started the next project, which is a buffet where the juice machine can be integrated.

"It will be quite unique to create such a solution that is mobile and can be moved around", concludes Karsten Felvang.

Betty mobile buffet

The hotel has a large business segment, but also lots of both Danish and foreign tourists that check into one of the 394 rooms, which showcase the absolute best in both Scandinavian and international design.
Kitchen, machines and various equipment are also of high quality – the same applies to the hotel's trolleys, which are used every day throughout the house to transport everything from food to tableware, and which are custom-made by Steelwood Concept.

"When the hotel opened, we had some standard trolleys delivered, and it wasn't many days before the first two had broken down. In a busy everyday life, it's clear that it's tempting to overload, and of course it doesn't work, but conversely you have to expect that they can last, but these couldn't, and I therefore contacted Henrik Bodhi from Steelwood Concept for to hear if he could be helpful with a solution", says F&B Manager at NH Collection Copenhagen, Hasse Fridh, who already had a fairly clear idea of what he needed before the first meeting.

"I DIDN'T BUY A PRODUCT - I GOT A TAILOR-MA SOLUTION"

Hasse Fridh
F&B Manager,
NH Collection Copenhagen

and it was a conscious choice, because it is suitably muted and blends in well with the rest of the interior, and if you place the trolley in a corner, it does not create unnecessary attention.

"I didn't just buy a product. I have bought a tailor-made solution and I think it works really well when you consider that the trolley has to be able to do everything, from transporting beer and water to cleaning up room service and fitting into a conference room or the restaurant".

And speaking of conference rooms, four trolleys are supplied with sides, which

"And another advantage of the sides is that you can move around the house with the trolleys without guest are able to see that we are driving around with rubbish", says Hasse Fridh, who describes the collaboration with Steelwood Concept as fantastic.

The trolley fits in nicely

"Henrik understood the task, and we got a trolley made that fits in beautifully", says Hasse, who makes no secret of the fact that he is a determined gentleman, and when you place an order of that magnitude that he has done, then demands and expectations are high, and they have been met in full - and the good cooperation continues.

Among other things, NH Collection Copenhagen has been supplied with

Dolly the Trolley - High version.
