power GRANULES® BIO

User instructions PowerGranules BIO®

Användarinstruktioner – Instructions d'utilisation – DE – IT

EN - PowerGranules BIO is made from a biodegradable material. When it comes into contact with bacteria it will start to degrade.

To keep the granules from degrading prematurely, always perform the daily cleaning as per instructions in the User manual, i.e., collect and rinse through thoroughly with water.

Correct dosing of detergent in the wash water will keep bacteria from multiplying.

Use the amount of granules that is indicated by the markings in the granule collector provided with the machine. Exchange the batch of granules when it is indicated on the display.

SE - Materialet i PowerGranules BIO är biologiskt nedbrytbart. När det kommer i kontakt med bakterier startar nedbrytningsprocessen.

För att förhindra allt för snabb nedbrytning, gör alltid daglig rengöring enligt instruktioner i Användarmanualen, dvs samla upp granuler och skölj noggrant igenom med vatten.

Korrekt dosering av diskmedel i diskvattnet förhindrar bakterier från att föröka sig.

Använd den mängd granuler som indikeras på kanten av granulatuppsamlaren som följer med maskinen. Byt ut hela satsen av granuler när det indikeras på displayen.

FR - PowerGranules BIO is made from a biodegradable material. When it comes into contact with bacteria it will start to degrade.

To keep the granules from degrading prematurely, always perform the daily cleaning as per instructions in the User manual, i.e. collect and rinse through with water thouroughly.
