Warming plate WP600

- Footprint:
Dimensions: W 1000 x D 500 mm
- ✓ Material: Stainless steel
- Temperature control: Thermostatic
- Temperature range: 35°C to 95°C

Description

Food should be served to guests at the correct preparation temperature. The warming plate WP600 is the perfect solution. The stainless steel warming surface transfers heat directly to the plates or bowls. The subtle design ensures that it does not take up more space than necessary.
