Sego

Compact bean-to-cup machine for the ultimate coffee experience.

All coffee specialties are made using freshly ground coffee beans. Furthermore, the Sego L tops off milk coffees like a cappuccino with fresh milk foam.

Pure enjoyment

The Sego is a fully automatic espresso machine. You can therefore enjoy the practical benefits of a fully automatic machine, such as: clear touchscreen operation, rapid service and consistently high-quality coffee. The professional components manufactured by Bravilor Bonamat ensure the optimal preparation of your espresso.

All coffee specialties are made using freshly ground coffee beans. The grinder with its stainless-steel discs grinds the coffee as desired coarse or fine, while the CIRCO brewer brings out the full flavour thanks to the right extraction and preparation time. The Sego L even makes milk coffees like a cappuccino with fresh milk foam: the ultimate coffee experience!

Extensive menu with 30 drinks

Bravilor Bonamat has carefully selected and pre-programmed the most popular coffee specialties for you. So your machine will quickly be up and running.

The range of drinks depends on the ingredients you choose. Cocoa, topping (milk powder) and/or fresh milk are chosen in most cases. Therefore the standard programme features: ristretto, espresso, americano, caffè crema, hot chocolate, espresso-choc, espreschoc, cappuccino, cappuccino dark, caffè latte, moccachino, latte macchiato, hot chocolate deluxe and milk. Of course, the Sego also serves hot water for tea or soup.

Drinks can be adapted to your particular needs. This includes settings like the consistency of grind, strength of coffee, water temperature, pre-wetting, contact time and cup size. Settings can be easily adjusted with a few taps on the touchscreen.

Blends in any environment

The Sego is suitable for many locations. Thanks to its compact footprint of only 31 cm, the fast and consistent preparation the Sego is an ideal coffee machine for the office. However, the Sego is also a very popular coffee solution for self-service environments, such as waiting rooms or showrooms at mid-sized companies.

The Sego is available in different versions, with or without a milk fridge. The machine can also be extended with accessories to minimise maintenance services.

A nice extra: if the Sego hasn't been used for some while it automatically switches into energy-saving mode.

Sego in a nutshell

- Bean-to-cup: freshly-ground coffee beans
- Easy to use, thanks to intuitive touchscreen
- Quick and simple installation
- Small and compact
- Durable materials ensure a long and reliable life
- Service and maintenance friendly
- Optional: integrated steam system provides fresh milk foam

Sego L with milk fridge

Sego L without milk fridge

Sego 12

- 1 canister for coffee beans.
- 2 canisters for instant ingredients, such as cocoa and topping.

Sego 11L

- 1 canister for coffee beans.
- 1 canister for an instant ingredient, such as cocoa.
- Integrated milk system for the fresh milk (separate steam boiler and milk frother).

Sego 12L

- 1 canister for coffee beans.
- 2 canisters for instant ingredients.
- Integrated milk system for the fresh milk (separate steam boiler and milk frother).

Service and maintenance: as easy as can be

The Sego is easy to maintain as the touchscreen communicates most activities automatically. For example, when the waste bin or drip tray needs emptying and the machine needs descaling.

Bravilor Bonamat has also designed, developed and patented a number of essential components in house to minimise maintenance services. For example, the unique hot-water system minimises limescale build up and the CIRCO brewer is easy to remove, dismantle and clean quickly.

Furthermore, Bravilor Bonamat came up with a well thought-out solution to take care of milk hygiene in the Sego L. Thanks to the clean-in-place self-cleaning system, the milk hose and milk frother require no manual attention at all. Ten minutes after every milk coffee the Sego L automatically rinses the milk hoses clean with water.

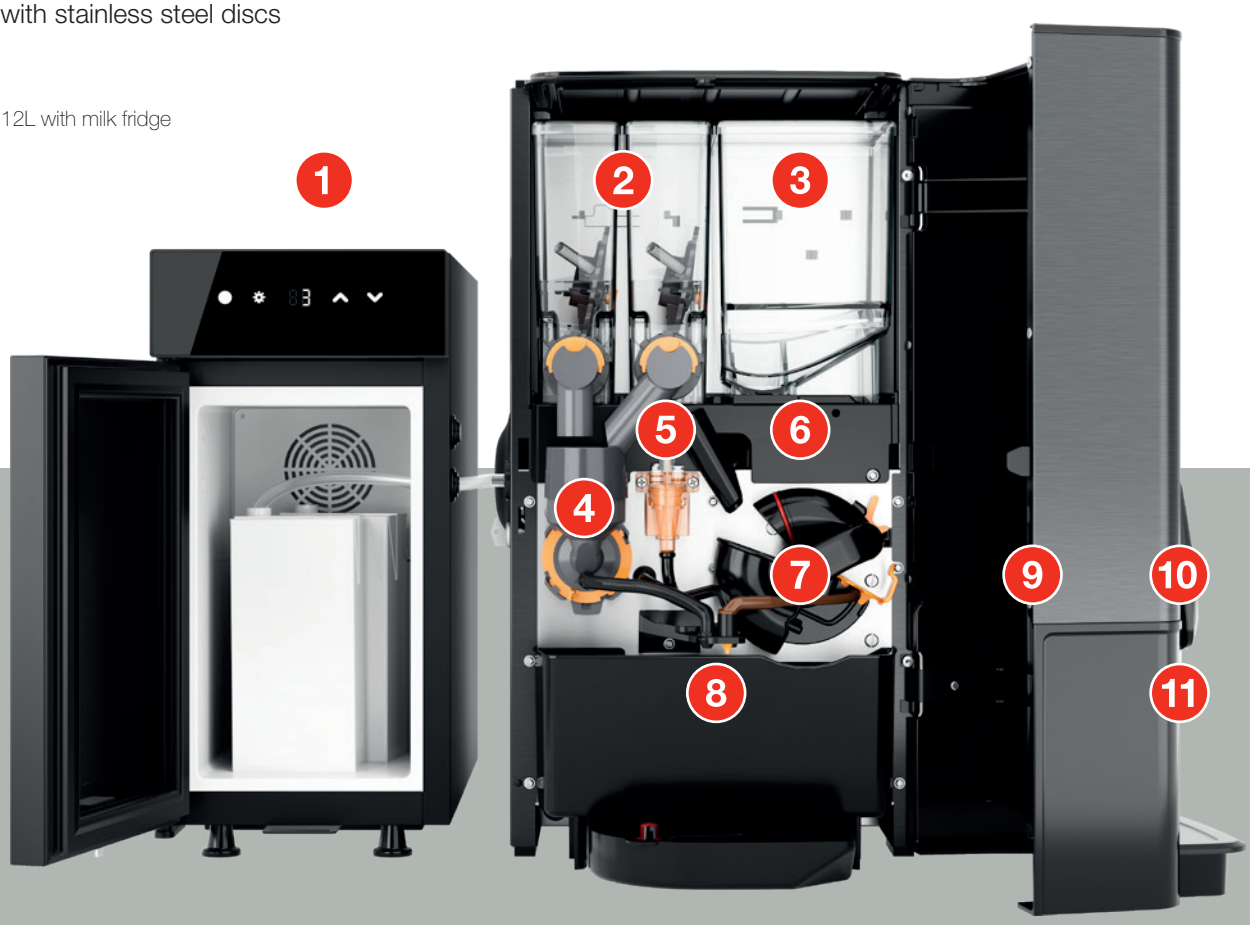

Sego 12

Sego as a fresh milk solution

1. Optional: Sego milk fridge
2. Canisters for instant ingredients
3. Canister for coffee beans
4. Patented mix system prevents an accumulation of instant ingredients
5. Integrated milk frother and steam boiler
6. Bravilor Bonamat grinder (not visible) with stainless steel discs
7. CIRCO brewer for optimal preparation
8. Single outlet for the perfect americano
9. USB port for e.g. software updates
10. Touchscreen with max. 30 choices of beverage
11. Tap height: 105-135 mm

Accessories

Would you prefer less regular maintenance?

The Sego can be upgraded to suit your specific requirements.

Using the **raiser set**, the Sego can collect more coffee waste and (cleaning) water. The raiser set comprises a pedestal, a larger waste bin, a larger drip tray and lower drip tray grid. With the adapted drip tray grid, the tap height is 135 mm. The total height of the Sego is raised by 6 cm when this set is added.

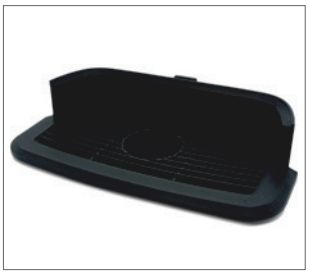

Using the **drainage set** you can attach an elevated Sego directly to the drain; which means the drip tray will be emptied automatically and you will no longer need to do it yourself.

Connectivity

The Sego can be connected to a payment system. The **MDB service set** is needed as a 'bridge' between the machine and the online (payment) system. Of course, with this set, the machine is also ideally equipped to plan routing processes more efficiently and reduce machine downtime. Ask about telemetry and other options.

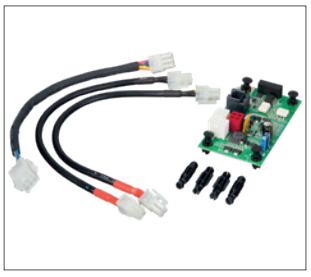

The **Sego app Contactless Coffee Control** can be installed on any smartphone. In this way, employees can take their own coffee without needing to touch the machine.

Sego as a marketing tool

The Sego lends itself exceptionally well to merchandising.

Firstly, a personalised screensaver can be set for the full-colour touchscreen. The background and the pictures of the drinks can be designed to your specifications.

Media files can be easily imported and copied thanks to the USB port in the door of the machine.

Branding

Depending on the desired amount, stickers or a full print can be applied to the Sego housing.

This way, you can use the Sego as a marketing and communication method to promote your (coffee) brand.

Please contact Bravilor Bonamat directly for more information.
