PRODUCT

O-Protect – Speed Oven Protector

PROFESSIONAL LINE

PRODUCT DESCRIPTION

O-Protect – Speed Oven Protector is a product that combines a high concentration of degreasing agents with other ingredients that prevent grease deposition in those oven areas that do not come into contact with food.
The product has elevated thermal resistance which prevents its degradation during oven operation, regardless of the operating temperature.
All components are promptly biodegradable.

COMPOSITION

The product contains, among other components, a quantity equal to or greater than 5%, but lower than 15% (w/w) of sodium carbonate. It also contains clays and polymers.

DOSING

Apply pure product by spraying in those oven areas that do not get in contact with food.

HOW TO USE

Apply the product by spraying in those oven areas that do not get in contact with food.

PHYSICAL AND CHEMICAL CHARACTERISTICS

Appearance and color: Opaque, slightly viscous, white-color liquid.
Odor: Characteristic
pH (at 20 ºC): 11.5 +/- 1
Viscosity: Approximately 30.0 cP

PACKAGING

5-liter containers

_____

SUBJECT: Declaration regarding reg. EU 2019/1148 on the management of explosive precursor substances or mixtures

regulation (EU) 2019/1148, which entered into force on 01/02/2021, establishes harmonized rules concerning the making available, introduction, possession and use of substances or mixtures that could be misused for the illicit manufacture of explosives, with a view to limiting their availability to the general public and in order to ensure the adequate reporting of suspicious transactions throughout the supply chain.
The explosive precursor substances in question are those listed in Annexes I and II of the Regulation.
The regulation consequently establishes obligations for companies that make these substances available to other economic operators, even in mixtures, in order to eliminate the risk of illicit use of explosives precursors.

In order to guarantee its customer regarding the issue in question, LAINOX declares that in the formulation of the detergents and descalers supplied for the care of the ovens, no substances listed in annexes I and II of the above regulation (EU) 2019/1148 are used.

Best regards

The Direction
