PRODUCT # Speed Oven Cleaner **PROFESSIONAL LINE**

DESCRIPTION

Greendet's O-Clean Speed Oven Cleaner is a product with a high concentration of cleaning agents with extraordinary grease removal capacity. The product was formulated to clean sensitive equipment such as Speed Ovens. It is also suitable for floor cleaning stoves, hoods, chimneys, grills, etc., Effectively eliminates all grease and carbon, even the most difficult, while simultaneously disinfecting all surfaces. Not aggressive to skin or surfaces. Its components are readily biodegradable.

COMPOSITION

This product contains, among other components, less than 10% (w / w) of Nonionic and amphoteric Surfactants.

DOSING

Apply the product using a spray gun. Spray the surface to be cleaned homogeneously. In more difficult soils, a second application or longer contact time may be required. It can also be used diluted to clean floors with the aid of a bucket and a mop.

HOW TO USE

Apply directly into the speed oven interior using a spray applicator. Homogeneously spray the surface to be cleaned with the product and let it act for about 5 minutes. Then wipe the surface with a damp cloth. In cases of very difficult stains let the product sit for about 20 minutes, or if necessary apply the product a second time. You can use a gentle scrubber to help remove stubborn soils and then wipe with a damp cloth over the surface.

PHYSICAL AND CHEMICAL CHARACTERISTICS

Appearance and color: Transparent liquid.
Perfume: Characteristic
PH (at 20 ° C): 11 +/- 1
Viscosity: Approximately 3.0 cP

PACKAGING

Packaged in 0,5, 5 and 20 litres.

_____

SUBJECT: Declaration regarding reg. EU 2019/1148 on the management of explosive precursor substances or mixtures

regulation (EU) 2019/1148, which entered into force on 01/02/2021, establishes harmonized rules concerning the making available, introduction, possession and use of substances or mixtures that could be misused for the illicit manufacture of explosives, with a view to limiting their availability to the general public and in order to ensure the adequate reporting of suspicious transactions throughout the supply chain.
The explosive precursor substances in question are those listed in Annexes I and II of the Regulation.
The regulation consequently establishes obligations for companies that make these substances available to other economic operators, even in mixtures, in order to eliminate the risk of illicit use of explosives precursors.

In order to guarantee its customer regarding the issue in question, LAINOX declares that in the formulation of the detergents and descalers supplied for the care of the ovens, no substances listed in annexes I and II of the above regulation (EU) 2019/1148 are used.

Best regards

The Direction
